

Here is what I write:

```
+nomarkup+some text 1-nomarkup-_italic_+nomarkup+some text 2-nomarkup-  
+nomarkup+some text 3-nomarkup-*bold*+nomarkup+some text 4-nomarkup-
```

And here is what I get:

```
+nomarkup+some text 1-nomarkup-_italic_+nomarkup+some text 2-nomarkup-  
+nomarkup+some text 3-nomarkup-bold+nomarkup+some text 4-nomarkup-
```

In other words:

- The bold markup `*...*` is recognized when sandwiched between nomarkup marks,
- But the italic markup `_..._` is **not** recognized when sandwiched between nomarkup marks.
